# COMPANY PROFILE

**AJANTA TRANS LOGISTICS PVT. LTD**  
BRIDGING DISTANCES AND FUELING GROWTH  
SINCE 1974

# COMPANY HISTORY

Since the birth of the Company in 1976 in Southern India by Late Mr. Sahadev Goyal and with the opening of the first branch in 1979 in Hyderabad, Ajanta Logistics has continued to develop along with India's Routes.

As a company that was at the outset engaged in part load consignments unloading and transport, Ajanta Logistics steadily expanded its field of operations to include such activities as Full load consignment, closing all part load branches. In addition, we currently offer industrial sector transporting from heavy machinery to raw materials as well as finished products, we have a wide range of vehicles serving requirements from trucks to pickups and trailers.

# WHY CHOOSE US?

At Ajanta Trans Logistics Pvt. Ltd., we deliver more than cargo – we deliver confidence. With a strong focus on punctuality, security, transparency, and reliability, we are committed to providing seamless and stress-free transportation solutions across India.

## What Makes Us Different:

### On-Time Deliveries

Our efficient operations and optimized routes ensure your goods always reach their destination as scheduled.

### High-Level Security

From loading to delivery, we follow strict safety protocols and GPS tracking to safeguard every shipment.

### Transparent Processes

Enjoy full visibility with real-time updates, open communication, and honest service at every step.

### Proven Reliability

Trusted by clients nationwide, we consistently deliver dependable logistics solutions backed by years of experience.

### 36-Hour Road Assistance

In case of an accident or breakdown, our dedicated support team provides on-road assistance within 36 hours, ensuring minimum disruption to your supply chain.

**AJANTA TRANS LOGISTICS PVT. LTD**

SINCE 1974

## OUR VISION

India's logistics vision is ambitious: reduce costs to 8-10% of GDP (down from the current ~14%) and achieve global parity in service quality. This will require coordinated investment in infrastructure, digitization, workforce development, and policy reform. Initiatives like National Logistics Policy and Gati Shakti show promise, but execution is key.

For logistics providers, the road ahead is not without its bumps – but with innovation, collaboration, and reform, India's highways can truly become the arteries of an efficient, future-ready economy.

## OUR PROMISE ON THE PATH AHEAD

The road logistics sector is evolving. It's complex, but it's also full of promise. With initiatives like the National Logistics Policy and Gati Shakti setting the tone, the future belongs to those who are prepared – structured in approach, human in delivery, and bold in vision.

At Ajanta Trans Logistics Pvt. Ltd., we're not just adapting to change – we're helping shape it, one reliable journey at a time.

SINCE 1974

# OUR VALUES

At Ajanta Trans Logistics Pvt. Ltd., we know that the road is more than just a route – it's where businesses move, partnerships grow, and progress happens. But even the strongest journey is shaped by the terrain. Today, India's road logistics sector is navigating both tremendous opportunity and critical challenges that demand resilience, innovation, and trust – the very values we stand for.

## 1. Infrastructure

While national projects have brought new highways and corridors, countless secondary roads remain patchy and unpredictable. Every pothole and bottleneck chips away at delivery timelines and vehicle health. As a company driven by precision and punctuality, we see firsthand how better roads could supercharge India's supply chain rhythm.

## 2. A Fragmented Industry Lacks Unity

Much of India's road transport is handled by small, unorganized operators. Without digital tools or standard practices, gaps arise – empty return trips, mismatched expectations, delayed deliveries. At Ajanta, we bridge that gap through structured operations and transparent systems that bring order to the chaos.

## 3. Compliance Remains a Bumpy Ride

From state borders to toll booths, regulatory complexities still trip up even the most experienced drivers. GST and e-way bills helped, but inconsistency lingers. Our commitment to full compliance, backed by trained staff and digital documentation, helps us move goods with confidence – even when the road throws us red tape.

**AJANTA TRANS LOGISTICS PVT. LTD**  
BRIDGING DISTANCES AND FUELING GROWTH  
SINCE 1974

#### **4. Tech Adoption Trails Behind Potential**

Not all fleets are digitally enabled, and many transporters lack access to GPS tracking, fleet analytics, or route optimization. Our approach is different – we leverage technology not just for efficiency, but for trust. Clients know where their goods are and how they're moving, every step of the way.

#### **5. Drivers Deserve a Better Journey**

Logistics runs on wheels, but also on willpower. India's truck drivers often face long hours, harsh conditions, and little recognition. At Ajanta, we see them as frontline heroes – and we back that belief with better support, timely assistance, and fair practices. Our 36-hour on-road assistance is just one way we stand with them.

#### **6. Pressure to Go Greener, Faster**

With rising fuel costs and climate imperatives, the industry is under pressure to evolve. Cleaner transport and smarter routes aren't a luxury – they're a necessity. As we grow, our eyes are on sustainability too, exploring ways to balance scale with responsibility.

**AJANTA TRANS LOGISTICS PVT. LTD**

SINCE 1974

# DIRECTOR'S MESSAGE

At Ajanta, logistics has never just been about moving freight – it's about building trust, honoring timelines, and elevating the people who make it all possible. From the earliest days of our journey, we've believed in one simple principle: dependable service stems from genuine care – for clients, partners, and the incredible drivers who keep the wheels of India turning.

Our team understands that every consignment is more than a delivery – it's a link in someone's livelihood, a step in someone's growth story. That's why we go the extra mile not only on the road, but in how we operate: with transparency, accountability, and a commitment to doing right by everyone we serve.

But roads don't run on engines alone – they run on people. At Ajanta, we deeply value our drivers and logistics crew. We're actively working to elevate their lives by providing better working conditions, timely support, and well-equipped trucks. From ergonomic seating and on-board hygiene kits to mobile connectivity and rest comfort, our fleet is being upgraded with thoughtful amenities to ensure that our frontline professionals feel respected, secure, and cared for – because their dignity drives our success.

As we navigate the future, we remain focused on innovation, integrity, and impact. Whether it's through technology, infrastructure, or team welfare, we believe that progress is only real when it's inclusive and sustainable. On behalf of the entire Ajanta family, thank you for trusting us to move your world – reliably, respectfully, and responsibly.

Warm regards,  
**Rudraksh Goyal**

# KEY CHALLENGES

## The Road Ahead: Challenges in India's Road Logistics Sector

India's road logistics network is the lifeblood of its domestic trade, handling over 60% of freight movement across the country. Stretching over 6.3 million kilometers, the national road network is among the largest in the world – yet it grapples with systemic issues that hinder its efficiency, reliability, and economic potential.

### 1. Infrastructure Bottlenecks

Despite major projects like Bharatmala, many routes still suffer from poor road conditions, congested corridors, and lack of last-mile connectivity. Inconsistent road quality, especially in rural and semi-urban areas, leads to vehicle wear and delays – impacting turnaround time and increasing operational costs for transporters.

### 2. Logistical Fragmentation

India's logistics sector is highly fragmented, dominated by small, unorganized operators with limited access to modern tools or capital. This fragmentation results in inefficiencies like empty return loads, poor fleet utilization, and non-standard pricing. It also limits scalability and consistency in service delivery.

**AJANTA TRANS LOGISTICS PVT. LTD**  
BRIDGING DISTANCES AND FUELING GROWTH  
SINCE 1974

### **3. Regulatory and Compliance Complexities**

While the introduction of e-way bills and GST was a step toward simplification, inter-state movement still encounters bureaucratic delays and inconsistent enforcement. Permitting, toll collection systems, and regional taxes continue to create friction points for road transporters.

### **4. Technology Gaps**

Digital adoption is accelerating, but many transporters, especially small fleet owners, still operate without real-time tracking, fleet management systems, or route optimization tools. This limits transparency and real-time decision-making across the supply chain.

### **5. Driver Shortage and Working Conditions**

India faces a growing shortage of trained truck drivers. Long hours, poor roadside amenities, safety concerns, and low wages deter new entrants and contribute to high attrition. Without focused workforce development, logistics will continue to struggle with human capital constraints.

### **6. Environmental Pressure and Fuel Dependency**

Road freight contributes significantly to CO<sub>2</sub> emissions. With rising fuel costs and climate concerns, there's growing pressure on the industry to shift toward cleaner transport solutions – yet electric vehicle infrastructure and policy support remain limited for heavy freight.

# OUR SERVICES

## **1. ODC Cargo (Over Dimensional Cargo)**

We facilitate container transportation and the efficient transport of goods in standardized, re-sealable transportable containers by rail and sea.

## **2. Container Transportation**

We facilitate container transportation and the efficient transport of goods in standardized, re-sealable transportable containers by rail and sea.

## **3. Industrial Cargo**

We also transport industrial goods by ship, aircraft, or other large vehicles in accordance with industry standards.

## **4. Heavy Duty Cargo**

The heavy-load cargo service provided by Ajanta Logistics is well known; our heavy-duty cargo vans have a capacity of over 34 tonnes.

**AJANTA TRANS LOGISTICS PVT. LTD**  
BRIDGING DISTANCES AND FUELING GROWTH  
SINCE 1974

## **5. Heavy Machinery**

We provide a one-stop shop for all logistics related to the transportation of heavy equipment, including packaging, forwarding, and storage.

## **6. Construction Cargo**

The transportation of construction materials is a complex matter that requires special attention for timing, safety, and cost-efficiency, and we are best at it.

## **7. Shipping Services**

Our Ajanta Logistics company provides best shipping services for customers. Customers can visit our website & get better shipping services offered in our company.

## **8. Road Survey**

Our Ajanta Logistics company conducts accurate road surveys for safe transport. Customers can trust our surveys to get better route planning for smooth delivery.
